

Philippine legislative records, easier to find and follow.

A free, mobile-first web app for looking up Philippine lawmakers and the bills they file.

ABOUT

The Philippine Congress has two chambers, each with its own website, formats, and numbering, and each three-year Congress sees thousands of bills filed. CivicSync PH brings those records together: one search across the Senate and House, one profile per lawmaker covering their whole career across both chambers, and one page per bill combining its history with its current status, committee, a plain-language summary, and links to the official record.

CivicSync is a guide to the official record, not a replacement for it. It is independent and non-partisan, and not affiliated with the Senate, the House of Representatives, or any government agency.

KEY FEATURES

Receipts

Every bill a senator or representative has authored, across both chambers and 13 congresses.

One search

Bills by keyword or number, typed however you like: "SB 1294", "hb4659", or a topic.

Bill pages

Current status, committee, plain-language summary, and links to the official record.

Watchlist

Follow bills without an account; optional sign-in syncs across devices.

Works anywhere

Phone-first, scales to desktop, installs like an app, opens visited pages offline.

DATA SOURCES

Lawmaker profiles and authorship history: **BetterGov Open Congress API**. Live status, committees, plain-language summaries (automated), and recent 20th Congress bills: **BatasWatch**. Readers should verify important details against official Senate and House records.

13

congresses covered, 8th to 20th (1987 to present)

165,000+

legislative records

13,600+

bills filed in the current 20th Congress
